

← NUTRI-PAK VIRTUALLY ELIMINATES GROUNDWATER AND SURFACE POLLUTION BY CONTAINING THE NUTRIENTS IN A "SEALED" MICRO-PORE PACKET. NO MATTER HOW MUCH WATER (RAIN OR IRRIGATION) PASSES THROUGH THE SOIL, ONLY A VERY SMALL AMOUNT OF FERTILIZER SEEPS OUT OF THE PACKET, GOING DIRECTLY TO THE ROOT ZONE OF THE PLANT. NO RUNOFF - NO LEACHING - AND VALUABLE NUTRIENTS ARE ALWAYS AVAILABLE TO THE PLANT.
